Clarifying how the 30% rate fits into the broader tariff landscape

What's NOT Included in the Chart (But Still Applies):

- General U.S. MFN duty rates ([HTS Search Tool](#))
- Anti-Dumping (ADD) or Countervailing Duties (CVD)
- Section 232 steel/aluminum tariffs – still apply separately and are not part of the reciprocal rate

Tariff Layering & Compliance Notes:

- The 30% rate is a starting point only – not a cap. Depending on your product classification, additional tariffs under Section 301, and Section 232, may stack.
- Do not double-count: Products already subject to a 25% Section 232 tariff (steel/aluminum & derivatives thereof) are excluded from the extra 10% reciprocal tariff.
- Certain product categories (like EVs, semiconductors, solar cells, gloves, and medical items) face higher 301 tariffs, now ranging from 50% to 100%.
- These changes are actively being enforced – importers should review classifications and duty risk proactively.

Filing Reminder:

CBP CSMS #65029337 confirms:

- Use HTSUS 9903.01.25 to apply the 10% reciprocal tariff during the 90-day period
- Stop using HTSUS 9903.01.63 (previous 125% rate)
